DETAILED ACTION

Applicants' drawings filed February 10, 2004 has been received and entered.

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 are drawn to a microparticle storage and delivery device, classified in class 604, subclass 890.1.
- II. Claims 10-19 are drawn to a dispenser implantable in the human body, classified in class 604, subclass 891.1.
- III. Claims 20-26 are drawn to a method of dispensing a dosage of a microparticle to an individual, classified in class 424, subclass 489.

The three inventions are independent and distinct, each from the other as they have acquired a separate status in the art as shown by their different classification and separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.
